JAN MARK PEREDA

Full Stack Developer

peredajanmark@gmail.com | +63 9612479406| 1Angeles City, Pampanga

SUMMARY

I am a Full Stack Web Developer with additional experience in IT technical support, focused on building clean, scalable web applications and keeping systems running reliably. I enjoy solving problems, both in code and in troubleshooting real technical issues, and turning ideas into practical solutions. Outside of development, I am passionate about badminton. I was a varsity player and have competed in tournaments, including national ranking competitions, which helped me develop discipline, focus, and teamwork.

WORK EXPERIENCE

Information Technology Support Engineer (Internship) | Clark Outsourcing **07/2026 - 10/2026**

- Provided technical support covering hardware troubleshooting, network troubleshooting, and remote IT support.
- Assisted users with resolving technical issues, configuring and maintaining networks, and ensuring smooth day-to-day IT operations.
- Handled software installation and configuration, and supported both Windows and macOS environments.
- Used remote access tools and a ticketing system to track, prioritize, and resolve support requests efficiently.
- Worked on-site in a Philippines-based support environment handling user and system-level technical issues.

Full Stack Web Developer | Lily & Co

07/2023- 08/2025

- Implemented automated workflows for inventory syncing and email alerts, cutting manual input by 50%.
- Built interactive dashboards for sales analytics and performance tracking using PostgreSQL and React.
- Integrated and customized Shopify front-end and back-end to streamline product updates, promotions, and checkout flows.
- Developed and deployed a custom inventory management system, reducing out-of-stock errors by 70%.
- Collaborating across teams to build digital infrastructure supporting customers and operations.Leading design and development of scalable web platforms and e-commerce systems for Lily & Co.

Full Stack Web Developer | MSTCONNECT EDUCATIONAL CONSULTANCY **07/2022 - 07/2023**

- Contributed to the development of MSTConnect's e-learning and online training ecosystem, building scalable educational tools and user systems.
- Designed and launched an end-to-end Learning Management System (LMS) serving 10,000+ students and professionals.
- Created custom quiz engines, certificate automation, and progress tracking modules to enhance learner engagement.

- Integrated secure payment gateways and user management systems for seamless enrollment and access.
- Optimized API calls and database queries, improving load times and ensuring system reliability.
- Partnered with marketing and design teams to roll out new features aligned with enrollment cycles.

Freelance Web Developer Spinhub **03/2019 - 06/2023**

- Served as a freelance Full Stack Web Developer for SpinHub, a sports and recreational events hub.
- Developed a sports event registration system supporting tournaments and club activities.
- Built interactive websites showcasing schedules, rankings, and live match updates to boost audience engagement.
- Designed promotional landing pages for badminton leagues, billiards events, and recreational promos.
- Integrated booking forms, calendar systems, and Google Maps for real-time court availability and directions.
- Customized WordPress themes to reflect SpinHub's dynamic brand and athletic culture.
- Built WooCommerce-powered online stores for sports gear and merchandise.
